

COMMUNICATIONS CRISIS!

AT&T has launched a full-blown assault on reliable communication in California, simultaneously:

1. *Suing the California Public Utilities Commission (CPUC) and California Attorney General Rob Bonta*
2. *Petitioning the FCC to **discontinue service** to 199,000 customers around California* (WC Dockets 26-120, 26-121)
3. *Petitioning the FCC to **preempt** the CPUC's Carrier of Last Resort rules, which ensure phone service is accessible to all Californians* (WC Dockets 26-123, 26-125)
4. *Pushing a **constitutional amendment** in California to deregulate telecom and fully prevent the CPUC from overseeing telecom*

AT&T's alleged "alternatives" are **NOT** equivalent substitutes. **25,000 911 calls failed** during AT&T's 2024 nationwide cellular outage. **Will yours be next?**

Landlines remain critical communications infrastructure for countless Californians:

- ✓ Work in power outages without backup batteries
- ✓ Do not depend on intermittent wireless coverage
- ✓ Provide exact location for 911
- ✓ Provide consistent, clear audio quality
- ✓ Work during nationwide cellular outages

LANDLINES ARE LIFELINES! PEOPLE OVER PROFIT, STOP AT&T!

TAKE IMMEDIATE ACTION TO SAVE OUR CRITICAL INFRASTRUCTURE!

Submit FCC comments, write your senators, sign petition, and more
